WRLIFE LIST OF DEGENERATIVE DISEASES

1	Alzheimer's disease (AD)
2	Amyotrophic lateral sclerosis (ALS, Lou Gehrig's disease)
3	Charcot–Marie–Tooth disease (CMT)
4	Chronic traumatic encephalopathy
5	Cystic fibrosis
6	Some cytochrome c oxidase deficiencies (often the cause of degenerative Leigh syndrome)
7	Ehlers–Danlos syndrome
8	Fibrodysplasia ossificans progressiva
9	Friedreich's ataxia
10	Frontotemporal dementia (FTD)
11	Huntington's disease
12	Infantile neuroaxonal dystrophy
13	Keratoconus (KC)
14	Keratoglobus
15	Leukodystrophies
16	Macular degeneration (AMD)
17	Marfan's syndrome (MFS)
18	Some mitochondrial myopathies
19	Mitochondrial DNA depletion syndrome
20	Mueller–Weiss syndrome

21	Multiple sclerosis (MS)
22	Multiple system atrophy
23	Muscular dystrophies (MD)
24	Neuronal ceroid lipofuscinosis
25	Niemann–Pick diseases
26	Osteoarthritis
27	Osteoporosis
28	Parkinson's disease
29	Pulmonary arterial hypertension
30	All prion diseases (Creutzfeldt-Jakob disease, fatal familial insomnia etc.)
31	Progressive supranuclear palsy
32	Retinitis pigmentosa (RP)
33	Rheumatoid arthritis
34	Sandhoff Disease
35	Spinal muscular atrophy (SMA, motor neuron disease)
36	Subacute sclerosing panencephalitis
37	Substance Use Disorder
38	Tay–Sachs disease
39	Vascular dementia (might not itself be neurodegenerative, but often appears alongside other forms of degenerative dementia)
